

PENINSULA

Streamlining Global Payroll

DIGITAL TRANSFORMATION SPECIALISTS

unipro

Success story

Peninsula, a global leader in maritime fuel trading and supply, required a digital solution to address inefficiencies in their payroll and cost management processes. The goal was to consolidate payroll data and provide insights for strategic decision-making and compliance.

The Challenge

Managing payroll across multiple regions and vendors posed significant challenges:

- Disparate regional processes causing inconsistencies.
- Manual data consolidation prone to errors and inefficiency.
- Limited unified insights for global payroll analysis.
- Compliance needs for GDPR and robust audit trails.

The Solution

After a detailed consultative engagement, Unipro was appointed to develop a bespoke Cost Centre Application using a robust C#/.NET architecture.

Key features include:

- **Automated Processing:** secure uploads, validation,and consolidation of payroll data
- **Dynamic Reporting:** real-time insights with filters for key parameters
- **Compliance:** GDPR-compliant data retention and detailed audit trails
- **User Security:** role-based access through Active Directory
- **Scalable Design:** modular architecture for future enhancements

The Results

The Cost Centre Application streamlined payroll operations, delivering efficiency, actionable insights, and a scalable foundation to meet future business and compliance needs.
